

Temecula Valley Charter School

First Grade

Learning and Development

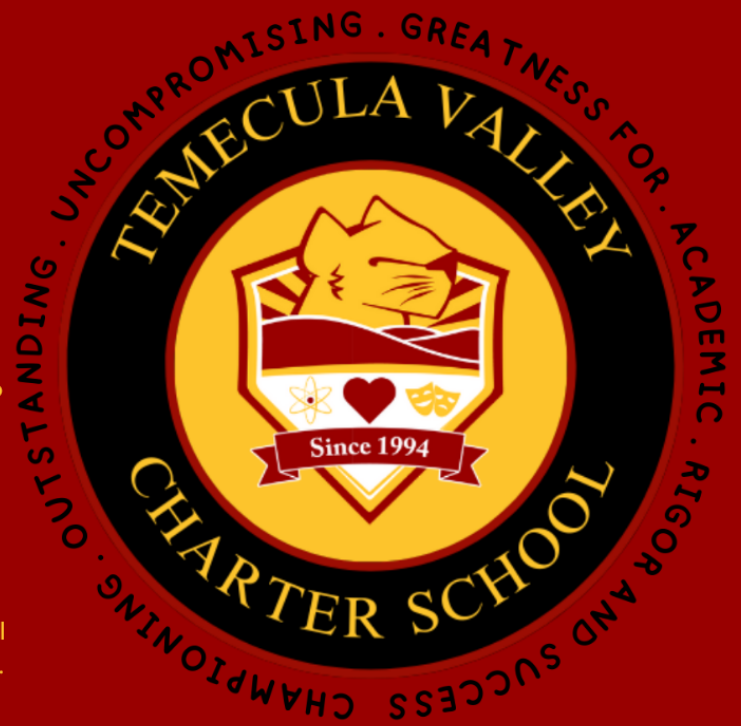

An instrumental year where students progress from letter sound isolation to decoding, fluency and finally reading comprehension. Math is a systematic approach from one on one correspondence to multi-step word problems requiring the mastery for reading comprehension. All teachers are certified in the "Science of Reading" to make this happen!

Academic Rigor

First Grade is the critical year where they gain the foundation in all academic subjects for their optimal success in their future learning. The vast degree of state standards are methodically taught in a strategic manner throughout the year.

Science and the Arts

At TVCS we have dedicated Science and Visual/Performing Arts faculty that work with our students on a weekly basis. Our kinders love journeying to the science lab to perform experiments and complete hands-on lab experiments.
